Programming Languages

♥ Python
C, JAVA, ASP.NET
Visual Basic C#,
PHP, MySQL, HTML,
CSS, JavaScript

Frameworks

Django, Flask, Angular.

Learning

FastAPI

Education

2018–2022	**B.Tech** in Computer Engineering (8.39 CPI)	Dharmsinh Desai University
2016–2018	**HSC** from Ashadeep Vidhyalaya, Surat (87.40 %)	GHSEB
2015-2016	**SSC** from Mangaldeep Vidhyalaya, Surat (86.00 %)	GSEB

Projects

Apr-2021   Speech Processing and Voice Recognition   Flask Framework | Python | SQLAlchemy
• Like Google Assistant or Alexa, an online application that may be used as a voice assistant.
• The user can provide input in the form of a voice command, which the system will process and respond to. Set or remove reminders, play YouTube music, start or close programmes, and so on are some of the capabilities given by this system.

Apr-2021   PagarBook   WCF Service | Web API | ASP.net | C# | MySQL
• We used webapi and wcf services in this Windows forms-based application. Admins can change or add information about employees, and they must update attendance every day.
• Our software can determine an employee's pay based on their attendance.

Oct-2020   E-Wallet Web Application   Angular 7 | Node.js | MongoDB
• A Mean-stack application where users can register and log in. Users can only sign up if they have a bank account in our database.
• Money can be transferred using a user's account number and phone number.
• Users can also request money to be sent to their phone number, money to be transferred from their bank account to their wallet, pay bills, make reservations, contact us, and use other services.

Oct-2020   E-Commerce Web Application   ASP.net | C# | MySQL
• A web application that allows user to register and login. After login he/she can add a intrested product to cart or favourite list. After adding all intrested products to cart he/she can pay for item and checkout.
• Admin has functionality to add/update/delete a product and can change a delivery status from undelivered to delivered.

Apr-2020   Bus Ticket Booking   Python | Django Framework and PHP | phpMyDdmin
• A web-based programme, the Online Bus Ticket Reservation System. where the administrator may add or edit bus information, and users can login or register to verify bus availability on their routes and dates.
• user can make a reservation or cancel it within 24 hours of departure. User can also obtain an e-ticket from our website.

Interests

Python programming and backend
Develop creative application in Python as well backend developments.

Learn about new Web technology
Learn about the latest technology which helpful in company and Improve my programming Skills as well.

Achievements

Successfully Deployed Web Applications
Heroku

E-Wallet Web Application ↗

Bus-Ticket Booking Web Application ↗

HackerRank Achievments
Got Certified and achieved 5 star in Problem Solving and python.

Codechef
Achieved 3 star Rating in Codechef.

Skills

Programming Ability
Good programming skills in Python, JAVA and C.

Knowledge of Git and Heroku
My all project repository are available on Github.

Quick Learning Capability
Quick learning all the fundamental of the Software Technology.

Good in Communication
Know three different languages.
